

Capturing Ventilator Data

Capturing ventilator data is possible using a Getz Touch Device through:

- Anaesthesia machine with ventilator
- Directly through a ventilator machine

COVID-19 related vitals and respiratory information for current and future analysis can be collected.

Benefits of Using Getz Clinical in ICUs

Clinicians can feel confident that medical charting and all notes are being captured and collected

Reduces administrative effort, when direct patient care is most critical

Clinicians, doctors and nurses can record extensive ICU visits resulting in a legible medical report for analysis
